

MARCO ANTONIO SANDOVAL ESPINOSA

Senior Software Engineer

mrsandvv@gmail.com | linkedin.com/in/mrsan | github.com/mrsandv | +52 55 803 673 17 | Mexico City

Senior Software Engineer with 7+ years building production systems across high-growth startups. Specialize in **Go**, **Next.js**, and **serverless** architectures on major cloud providers. Currently implementing **MCP-integrated workflows** and **LLM-powered agents** to automate engineering and operations. Led the web team at **Flink/Webull MX** through hiring, mentorship, and legacy-to-cloud migration.

TECHNICAL SKILLS

Languages	Go, TypeScript, JavaScript (ES6+), SQL
Backend	Microservices, REST APIs, Serverless, Echo/Gin (Go), Express (Node)
Frontend	Next.js, React, Svelte, Tailwind CSS, Shadcn UI
Databases	PostgreSQL, MongoDB, Redis
Cloud & DevOps	AWS, Docker, GitLab CI/CD, GitHub, Vercel
Observability	Sentry, Grafana
AI & Automation	AI agents (Claude, Gemini, open-source), MCP servers (Model Context Protocol), Anthropic & OpenAI APIs, local LLMs (Ollama), Claude Code, v0, prompt engineering
Practices	Agile/Scrum, AI-Augmented Engineering, Technical Mentorship, Code Review, CI/CD

EXPERIENCE

Sr. Software Engineer Dec 2025 -- Present

Commando Studio

- Boutique gym chain serving **100K+ registered users** and **300K+ monthly transactions**; recently capitalized and scaling its tech operations.
- Built low-latency **Go** APIs and serverless integrations connecting POS, payment aggregators, **Salesforce**, and **Odoo** to power downstream provider workflows.
- Engineered an **AI-augmented incident-response loop** integrating **Sentry** and **Grafana** with **Claude-based agents** that triage production errors, auto-generate tracked tickets in **Asana**, accelerating time-to-diagnosis on production issues.
- Architected automated payroll reconciliation in **Go** and **Next.js**, replacing a 6-hour manual coach-payrate process with a 5-minute one-click workflow (**98% time reduction**).
- Implemented **GitLab CI/CD** pipelines and drive technical mentorship and security reviews across the engineering team.

Web Tech Lead Jan 2020 -- Jul 2025

Flink/Webull MX

- Led a team of 4 engineers**; owned hiring, 1:1s, career planning, agile delivery, and established engineering standards adopted across the web org.
- Architected transactional email infrastructure handling **50K+ daily sends** and a **2FA system** serving **2K+ daily authentications**.
- Standardized **Next.js + TypeScript** as the core web stack across all products, reducing onboarding time and codebase fragmentation.
- Migrated legacy systems to containerized **AWS** infrastructure (ECS, Lambda, S3, CloudFront, RDS), modernizing deployment and reducing manual operations.
- Scaled marketing SPAs serving **5K+ monthly visits** with optimized performance and CI delivery.

Frontend Developer Nov 2018 -- Jan 2020

Forward Company

- Contributed across the full stack of a **Laravel**-based LMS; migrated 100% of legacy inline styles to **SCSS**, improving frontend scalability and maintainability.
- Built **React** components compiled to HTML and injected via **Blade** templates for localization-driven dynamic content delivery; collaborated on UX flows and mockups for new platform features.

EDUCATION

Software and Networks Engineering, UVM --- Universidad del Valle de México 2023 -- Present
Physics BS, UNAM --- Universidad Nacional Autónoma de México 2009 -- 2015

LANGUAGES

Spanish Native.
English B2+ (EF SET).
